The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 34, 37, 38 are rejected under 35 U.S.C. 102(b) as being anticipate by Leonard et al.

Leonard et al teach a transdermal pharmaceutical delivery system comprising a thin layer of foamed material (abstract). Polyurethane is disclosed (column 2 line 62, Figures II and IV). Estrone sulfate is specified (column 3 lines 44-45). As to the claimed property of anti-fouling, the anticipatory compound must possess such property, because it is the same as that claimed.

Claims 34, 37-39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 34 "vinyl", "acrylic", "resin", "acrylate" and "elastomeric" are vague; it is unclear as to whether "vinyl", "acrylic", "acrylate" and "elastomeric" refer to monomers or polymers. "resin" is vague because it is unclear what resin is intended. It is noted that on page 11 lines 21-25, applicants disclose vinyl resins, epoxy resin, phenolic resins, polyamide resins, and acrylate polymers. On page 22 lines 9-10 applicants disclose acrylic and alkyd resin bases. On page 11 line 24 applicants disclose "elastomers", a term recognized as an abbreviation of elastomeric polymers.

No claims allowed.
